

New! KIOSK by Qualsys

Raise risks, opportunities and feedback
in 10 seconds

Qualsys

1. Easily raise incidents, safety reports and risks

Kate Armitage
Head of Quality,
Qualsys

KIOSK by Qualsys is built on a simple concept: make it easy for people to raise findings, risks, incidents from anywhere in the business, then instantly push this information into your management system.

More than 50% of issues are never recorded.

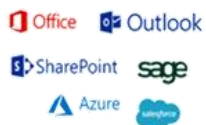

The [Global Governance, Risk and Compliance Report](#) estimates that 50% of crucial issue, risk and feedback are never recorded or insufficient. This is both a danger and an opportunity.

Raise, record and pass on quality data
in 10 seconds

KIOSK by Qualsys is accessible to all via
touch screen PC, tablets and
smartphones as an add-on. Your
employees use tactile touchscreens
installed on the shop floor.

When governance, risk and compliance
is simple and accessible for all,
excellence becomes part of your
business DNA.

Fully integrated, available everywhere

Tablet (iOS / Android)

Modern web browser (Chrome, Edge etc)

Kiosk mode (beta)

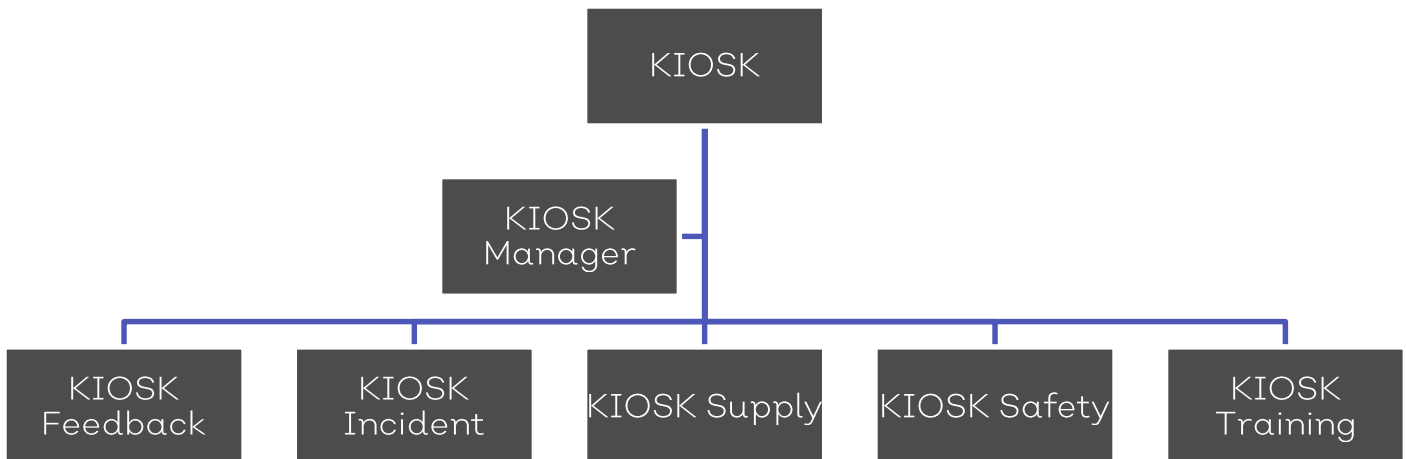

Smartphone (iOS / Android)

How it works: 3 steps

1) Choose the data you need

Do you want to raise incident information from your factory floor? Collect customer feedback? Or pinpoint safety risks on your assembly line?

Choose from five ready-made KIOSK Applications, or upgrade to KIOSK Manager and configure your own bespoke KIOSK applications.

Raise Incident

Main menu

Configure questions and answers:

Question 1:

Where are you?

Factory

Supplier

Desk

Upload

Question 2:

What is the incident priority?

2) Choose where you will use KIOSK

KIOSK by Qualsys is designed to function across your business space, anywhere you need it.

Secure your 'always on' KIOSK stations to high footfall zones for everyone to access.

KIOSK works on touch screen mobiles, tablets and desktops – so your management system connects to the entirety of your business.

3) Complete visibility

KIOSK is an easy, fast and simple tool that anyone in your business can use.

With pictorial menus and simple navigation, employees can complete a form in just 10 seconds without any training.

Once a KIOSK form is completed, the data is automatically pushed into your management system. Automated workflows and notifications drive responsive action instantly, while findings are pulled into system reports for analysis.

By allowing rapid, simple input from the entire workforce, KIOSK gives complete visibility of your business performance, enhances decision-making and boosts issue, incident and accident response speed.
